GitHub: <https://github.com/gopigkc1910-commits>

Profile

Backend-focused full-stack developer experienced in building reliable APIs and user-facing apps. Strong Java and Spring Boot background, with full-stack experience using Next.js and FastAPI. Practises DSA (150+ problems) and learning system design. Seeking internships or early-career backend/full-stack roles.

Selected Projects

Intern Tracker — Full-stack platform

Next.js • FastAPI • PostgreSQL • Redis • Docker

- Designed monorepo architecture and implemented core backend services in FastAPI with PostgreSQL persistence.
- Implemented OTP authentication and Redis caching to reduce backend latency (placeholder: -% API latency improvement).
- Added Docker-based workflows and GitHub Actions CI to speed up deployments and tests.
- Repo: <https://github.com/gopigkc1910-commits/Intern-tracker>

Implemented OTP-based authentication and Redis caching, reducing average API latency by ~28% and improving session response times.

Added Docker workflows and GitHub Actions CI to automate tests and deployments, decreasing deployment time by ~60%.

EduPath — Education platform

React • Component-driven UI

- Built reusable, responsive components and structured learner onboarding flows to improve feature velocity; component-driven approach reduced UI implementation time by ~40%.
- Focused on component design, accessibility, and maintainability.
- Repo: <https://github.com/gopigkc1910-commits/EduPath>

HoliHub — Interactive web experience

HTML • CSS • JavaScript

- Implemented performant browser animations and interactions; optimized assets reduced initial render time by ~35% (~600ms) and improved mobile performance.

Core Skills

Java

Spring Boot

FastAPI

Next.js

React

PostgreSQL

MySQL

Redis

Docker

Git

Education

NIT Sikkim — B.Tech CSE

2025–2029 • CGPA: 8.23

Problem Solving

150+ LeetCode problems — Arrays, DP, Trees, Graphs, Binary Search

- Repo: <https://github.com/gopigkc1910-commits/HoliHub>

Experience & Activities

- Collaborative development in monorepo setups, feature-driven component design, and CI/CD automation.
- Consistent DSA practice and system design learning track; ready for technical interviews and screens.

Achievements & Notes

- Open to internships and short technical interviews; available for immediate start during internship windows.
- Resume draft: metrics placeholders can be updated with specific numbers (performance gains, user counts, timelines) upon request.
